CONTENTS OF VOLUME 110

NUMBER 1, JANUARY 1, 1981

CELL CULTURE

- Quantitative Assay for Mutation in Diploid Human Lymphoblasts Using Microtiter Plates
Emma E. Furth, William G. Thilly, Bruce W. Penman, Howard L. Liber, and William M. Rand 1

CHROMATOGRAPHIC AND ELECTROPHORETIC TECHNIQUES

- A New Electrophoretic Method for the Separation of Disaccharides Obtained by Digestion of Chondroitin Sulfates and Dermatan Sulfate with Chondroitinases
Itaru Miyamoto, Hitoshi Watanabe, and Sumi Nagase 39
- A Method for Analyzing the ADP-Ribosylation of Nuclear Proteins on Polyacrylamide Gels
Peter R. Stone, Michael R. Purnell, and William J. D. Whish 108
- Estimation of the Size of Collagenous Polypeptides by Sodium Dodecyl Sulfate-Polyacrylamide Gel Electrophoresis
Milton E. Noelken, Billie J. Wisdom, Jr., and Billy G. Hudson 131
- Quantitative Analysis of 6-Hydroxymelatonin in Human Urine by Gas Chromatography-Negative Chemical Ionization Mass Spectrometry
Masahiro Tetsuo, Sanford P. Markey, Robert W. Colburn, and Irwin J. Kopin 208

ENZYMATIC ASSAYS AND ANALYSES

- An Assay for Activity of Arogenate Dehydratase Based upon the Selective Oxidation of Arogenate
Charles L. Shapiro, Roy A. Jensen, Karl A. Wilson, and John R. Bowen 27
- A New Assay for Picomole Levels of Androsterone and Testosterone Using Immobilized Luciferase, Oxidoreductase, and Steroid Dehydrogenase
Jeanne Ford and Marlene DeLuca 43
- A Spectrophotometric Method for the Assay of Phospholipase D Activity
George M. Carman, Anthony S. Fischl, Maureen Dougherty, and Gerhard Maerker 73
- Measurement of Chick Kidney 25-Hydroxyvitamin D₃-1 α -Hydroxylase without Use of Radioactive Substrate
Yoko Tanaka and Hector F. DeLuca 102
- The Thiolesterase Activity of Sulfhydryl-Activated Enzymes. A New Assay for Thiol Proteases Based on Activation by Sepharose-Bound Mercaptan
Robert M. Metrione 117
- A Test for Endogenous Interferences in Superoxide Dismutase Assays
Graig E. Eldred and J. Russell Hoffert 137
- A Sensitive Method for the Detection of Aspartate:2-Oxoglutarate Aminotransferase Activity on Polyacrylamide Gels
Toshiharu Yagi, Hiroyuki Kagamiyama, and Mitsuhiro Nozaki 146
- A Positive Zymogram for Distinguishing among RNase and Phosphodiesterases I and II
M. E. Hodes and Judith E. Retz 150
- Evaluation of 3-Hydroxy-3-Methylglutaryl-CoA Reductase Activity by Multiple-Selected Ion Monitoring
G. Cighetti, E. Santaniello, and G. Galli 153

A General, Fast, and Sensitive Micromethod for DNA Determination: Application to Rat and Mouse Liver, Rat Hepatoma, Human Leukocytes, Chicken Fibroblasts, and Yeast Cells	<i>Berta Fiszer-Szafarz, David Szafarz, and Alba Guevara de Murillo</i>	165
A New, Fast, and Sensitive Assay for NADH-Ferredoxin Oxidoreductase Detection in Clostridia	<i>Hubert Blusson, Henri Petitdemange, and Robert Gay</i>	176
The Interferon-Induced Enzyme Oligo-Isoadenylate Synthetase: Rapid Determination of Its <i>in Vitro</i> Products	<i>Gilles Merlin, Michel Revel, and David Wallach</i>	190
New Fluorogenic Substrates for Renin	<i>Kazuo Murakami, Tamiko Ohsawa, Shigehisa Hirose, Katsumi Takada, and Shumpei Sakakibara</i>	232

IMMUNOLOGICAL PROCEDURES

Radioimmunoassay for Biopterin in Body Fluids and Tissues	<i>Toshiharu Nagatsu, Tokio Yamaguchi, Takeshi Kato, Takashi Sugimoto, Sadao Matsuura, Miki Akino, Shoichiro Tsushima, Nobuhiko Nakazawa, and Hiroshi Ogawa</i>	182
Purification of an Ammonium-Inducible Glutamate Dehydrogenase and the Use of Its Antigen Affinity Column-Purified Antibody in Specific Immunoprecipitation and Immunoabsorption Procedures	<i>Anthony T. Yeung, Katherine J. Turner, Newell F. Bascomb, and Robert R. Schmidt</i>	216

INORGANIC AND METALLOORGANIC COMPOUNDS

Affinity and Stoichiometry of Calcium Binding by Arsenazo III	<i>Paul J. Bauer</i>	61
---	----------------------	----

LIPIDS AND LIPOPROTEINS

Radiochemical Assay of Long-Chain Fatty Acids Using ^{63}Ni	<i>Hubert F. De Brabander and Roger Verbeke</i>	240
--	---	-----

METABOLITE DETERMINATION

<i>In Vivo</i> Studies of Carnitine and Fatty Acid Metabolism: Problems with Use of Anesthetics	<i>Eric P. Brass and Charles L. Hoppel</i>	77
Detection of the Amine Derivative of Misonidazole in Human Urine by High-Pressure Liquid Chromatography	<i>A. J. Varghese</i>	197

NUCLEIC ACIDS AND PROTEIN SYNTHESIS

A Computer Program for Determining the Size of DNA Restriction Fragments	<i>Ronald G. Duggleby, Howard Kinns, and Julian I. Rood</i>	49
The Method of Crosslinking Histones to DNA Partly Depurinated at Neutral pH	<i>E. S. Levina, S. G. Bavykin, V. V. Shick, and A. D. Mirzabekov</i>	93
Rapid Preparation of Covalently Closed Circular DNA by Acridine Yellow Affinity Chromatography	<i>Walter S. Vincent III and Elliott S. Goldstein</i>	123
Bacteriophage Purification by Gel Chromatography	<i>Béla Sain and Sára Erdei</i>	128
Quantitative Ethanol Precipitation of Nanogram Quantities of DNA and RNA	<i>David J. Shapiro</i>	229

PEPTIDES, AMINO ACIDS AND AMINO ACID DERIVATIVES

7-Nitrobenz-2-oxa-1,3-diazole (NBD)-Phallacidin: Synthesis of a Fluorescent Actin Probe	<i>Larry S. Barak and R. Rogers Yocum</i>	31
Comparative Peptide Mapping at the Nanomole Level	<i>R. G. Whittaker and B. A. Moss</i>	56
A Simple, Rapid, Manual Peptide Microsequencing Procedure	<i>H. S. Lu, P. M. Yuan, J. M. Talent, and R. W. Gracy</i>	159
Hydrogen-Deuterium Exchange Study of Amino Acids and Proteins by 200- to 230-nm Spectroscopy	<i>Tetsuo Takahashi, Mamoru Nakanishi, and Masamichi Tsuboi</i>	242

PHYSICAL TECHNIQUES

An Improved Method of Microdialysis	<i>Chu Kwan Lau and James M. Fujitaki</i>	144
-------------------------------------	---	-----

PROTEIN ANALYSES AND REAGENTS

Conversion of the Reactive Sulfhydryl Groups of Proteins to the S-Trifluoroethyl Derivatives. Application to Human Hemoglobin	<i>Francis C. Knowles</i>	19
A Method for Detecting Nanogram Amounts on Proteins on Sodium Dodecyl Sulfate-Polyacrylamide Gels	<i>Yuen W. Shing and Arnold Ruoho</i>	171

PURIFICATION OF ENZYMES AND PROTEINS

A New Simple Preparation Method for NaK-ATPase-Rich Membrane Fragments	<i>Atsunobu Yoda and Shizuko Yoda</i>	82
A Rapid Sensitive Silver Stain for Polypeptides in Polyacrylamide Gels	<i>Carl R. Merril, Miriam L. Dunau, and David Goldman</i>	201

SPECIAL TECHNIQUES

A Nonlinear Regression Program from Small Computers	<i>R. G. Duggleby</i>	9
---	-----------------------	---

VITAMINS, COENZYMES, AND NUCLEOTIDES

A Gas Chromatographic Method for the Analysis of Lipoic Acid in Biological Samples	<i>Robert H. White</i>	89
--	------------------------	----

NUMBER 2, JANUARY 15, 1981

AUTOMATED ASSAYS

On-Line Measurement of Catecholamine Secretion	<i>David J. Green and Robert L. Perlman</i>	270
Two Simple Programs for the Analysis of Data from Enzyme-Linked Immunosorbent (ELISA) Assays on a Programmable Desk-Top Calculator	<i>D. G. Ritchie, J. M. Nickerson, and G. M. Fuller</i>	281

CARBOHYDRATES

A Method for Determinations of Microgram Amounts of Chitin in Arthropod Cuticles	<i>R. H. Hackman and Mary Goldberg</i>	277
--	--	-----

- Elimination of 2-Deoxyribose Interference in the Thiobarbituric Acid Determination of N-Acetylneuraminic Acid in Tumor Cells by pH-Dependent Extraction with Cyclohexanone *John Roboz, Maitree Suttajit, and J. George Bekesi* 380
- Separation of Dolichylpyrophosphoryl oligosaccharides by Liquid Chromatography *Gerald B. Wells, Salvatore J. Turco, Barbara A. Hanson, and Robert L. Lester* 397

CELL CULTURE

- A Rapid Fluorometric Method for the Estimation of DNA in Cultured Cells *Bradley G. Erwin, Christa M. Stoscheck, and James R. Florini* 291

CHROMATOGRAPHIC AND ELECTROPHORETIC TECHNIQUES

- Separation of the Major Species of Interstitial Collagen by Reverse-Phase High-Performance Liquid Chromatography *A. Fallon, R. V. Lewis, and K. D. Gibson* 318
- Visualization by Chilling of Protein Bands in Polyacrylamide Gels Containing 8 M Urea: Preparation and Quantitation of Foot-and-Mouth Disease Virus Capsid Proteins *Howard L. Bachrach* 349

DRUG ANALYSIS

- Competitive Interaction of Biliverdin and Bilirubin Only at the Primary Bilirubin Binding Site on Human Albumin *Charles E. Ahlfors* 295

ENZYMATIC ASSAYS AND ANALYSES

- The Enzymatic Measurement of Adenine Nucleotides and P-Creatine in Picomole Amounts *W. D. Lust, G. K. Feussner, E. K. Barbehenn, and J. V. Passonneau* 258
- Proteolytic Enzymes as Probes for the Triple-Helical Conformation of Procollagen *Peter Bruckner and Darwin J. Prockop* 360
- Assay of Tannase (Tanin Acylhydrolase EC 3.1.1.20) by Gas Chromatography *Daniel Jean, Henri Pourrat, Aimée Pourrat, and Andrée Carnat* 369
- An Enzymatic Microassay for Lactose *Donald P. Kotler, Anita R. Tierney, and Norton S. Rosensweig* 393
- Evaluation of the Jackknife Technique for Fitting Multiexponential Functions to Biochemical Data *I. A. Nimmo, Anne Bauermeister, and J. E. Dale* 407
- Automated Kinetic Analysis of Pyruvate Kinase *Rebecca L. Cochran and John A. Black* 420
- A Simple and Novel Method for Radiometric Analysis of Glucose Utilization by Adrenal Chromaffin Cells *Harvey B. Pollard, Samuel S. Stopak, Christopher J. Pazoles, and Carl E. Creutz* 424

LIPIDS AND LIPOPROTEINS

- An Improved Detection System Applied to the Study of Serum Lipoproteins after Single-Step Density Gradient Ultracentrifugation *Janet Nilsson, Valsa Mannickarottu, Celina Edelstein, and Angelo M. Scanu* 342

METABOLITE DETERMINATION

- Spectrophotometric Measurement of Hydroxylamine and Its *O*-Alkyl Derivatives
T. K. Korpela and Mauri J. Mäkelä 251
- Measurement of Plasma α -Ketoisocaproate Concentrations and Specific Radioactivity by High-Performance Liquid Chromatography
Steven Nissen, Carol Van Huysen, and Morey W. Haymond 389

PEPTIDES, AMINO ACIDS, AND AMINO ACID DERIVATIVES

- Preparation of ^{15}N -Labeled L-Aspartic Acid Using Whole Bacteria as Enzyme Source
A. Ivanof, L. Muresan, L. Quai, M. Bologa, N. Palibroda, A. Mocanu, E. Vargha, and O. Bârzu 267
- Picomole Assays for N^{τ} -Methylhistidine by Gas Chromatography-Mass Spectrometry
D. E. Matthews, J. B. Starren, A. J. Drexler, D. M. Kipnis, and D. M. Bier 308
- An Improved Procedure for High-Sensitivity Microsequencing: Use of Aminoethyl Aminopropyl Glass Beads in the Beckman Sequencer and the Ultrasphere ODS Column for PTH Amino Acid Identification
Ajit S. Bhowan, John E. Mole, and J. Claude Bennett 355

PROTEIN ANALYSES AND REAGENTS

- Solubilization of Intact Collagen from Hamster and Baboon Lung
Jerry W. Stock, Mary C. Henning, and James F. Collins 323
- Alcian Blue as a Protein Stain for Sodium Alkyl Sulfate-Polyacrylamide Gels: Application to Analysis of Polypeptide Components of the Human Platelet
Thomas J. Kunicki, Douglas J. Christie, Jeffrey L. Winkelhake, and Richard H. Aster 412

PURIFICATION OF ENZYMES AND PROTEINS

- Solubilization of Sulfated Glycoproteins from Human Gastric Juice with Lysine-Sepharose
Kyoto Hotta and Kazue Goso 338
- A Simple Method for Preparation of Valency Hybrid Hemoglobins, $(\alpha^{3+}\beta^{2+})_2$ and $(\alpha^{2+}\beta^{3+})_2$
Akio Tomoda and Yoshimasa Yoneyama 431

SPECIAL TECHNIQUES

- A Simple Procedure for the Solubilization of NADH-Cytochrome b_5 Reductase
Arun C. Dey, Sheilagh Rahal, Robert L. Rimsay, and Ian R. Senciall 373

VITAMINS, COENZYMES, AND NUCLEOTIDES

- An Easy and Rapid Method for the Measurement of $[\gamma\text{-}^{32}\text{P}]\text{ATP}$ Specific Radioactivity in Tissue Extracts Obtained from *in Vitro* Rat Heart Preparations Labeled with $^{32}\text{P}_i$
Janet M. Cogoli and James G. Dobson, Jr. 331

in 2026

INFORMATION FOR AUTHORS¹

Analytical Biochemistry will publish articles on methods of interest to the biochemical sciences and all fields that impinge on biochemical investigation, including those areas of immunology that include analytical and preparative methods for application by biochemists, cell and tissue culture techniques, and purification methods for specific enzymes and other proteins when such work has resulted in a high level of purity. Areas such as methods for sequencing and synthesizing DNA and RNA will be included. Invited review articles dealing with timely topics in methodology will also be published. In addition, book reviews covering titles directly related to the scope of the Journal and, specifically, to analytical and preparative methods in biochemistry and such impinging fields as immunology and tissue culture, will be published.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Analytical Biochemistry* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Address. Manuscripts should be submitted to **Analytical Biochemistry, Editorial Office, 111 Fifth Avenue, New York, N. Y. 10003.**

Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. At least three copies should be submitted, each copy to include all figures (originals or glossy prints) and tables. The original copy must be typewritten, double-spaced, on one side of white bond paper, about $8\frac{1}{2} \times 11$ inches in size, with one-inch margins on all sides. Each manuscript should have a separate title page noting title of article, authors' names (without degrees), a running title (not exceeding 35 letters and spaces), an abstract (50–150 words), and the address to which proof should be mailed. **Also, on the title page, authors should indicate the appropriate subject category for listing in the Table of Contents.** Please number all pages of the manuscript.

Names of chemical or organic substances should follow the recommendations of the IUPAC–IUB Combined Commission on Biochemical Nomenclature (CBN) as published in the extended Information for Authors, appearing in the first issue of each year of this journal.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

Figures should be numbered consecutively with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed together on a separate sheet, double-spaced. All illustrations should be in finished form ready for the engraver. A convenient size for drawings is $8\frac{1}{2} \times 11$ inches (21×27.5 cm). Drawings should be made with India ink on tracing linen, smooth surface white paper, or Bristol board. Graph paper if used should be ruled in blue. Grid lines that are to show in the final engraving should be inked in black. Glossy prints properly prepared are acceptable.

Photographs must be kept to a minimum and should be glossy prints with strong contrasts; the magnification should be indicated by a scale where possible.

¹ An extended Information for Authors will be published in an early 1981 issue. Reprints are available from the Editorial Office. Authors should consult this Information for details on nomenclature, IUPAC–IUB rules and recommendations, and accepted abbreviations.

Tables should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text. All tables should have descriptive headings, typed (double-spaced) above the table.

Footnotes should be designated in text by superscript numbers and listed on a separate sheet; in tables, by superscript letters and placed at the bottom of the page containing the table.

References to the literature should be cited in the text by Arabic numerals in parentheses and listed at the end of the paper in consecutive order. Abbreviations of journal titles should follow the style used in *Chemical Abstracts' Service Source Index* (1969 Edition). Please note style of capitalization and punctuation for journal articles and edited books in the following examples:

1. Jones, J. B., Dilworth, G. L., and Stadtman, T. C. (1979) *Arch. Biochem. Biophys.* **125**, 255-260.
2. Metzler, D. E. (1977) *Biochemistry: The Chemical Reaction of Living Cells*, p. 298, Academic Press, New York.
3. Harrington, W. F. (1979) in *The Proteins* (Neurath, H., and Hill, R. L., eds), Vol. 4, pp. 246-409, Academic Press, New York.

Proofs. Galley proofs will be sent to the authors with reprint order forms. Fifty reprints of each article are provided free of charge. Additional reprints may be ordered on the form provided.
